

## Now let's go to our addNewFavorites() function

```
func addNewFavorites() {  
    let laughingFox = Favorite(name: "Laughing Fox", image:  
        "foxlaugh")  
    let chihuahua = Favorite(name: "Chihuahua", image:  
        "chihuahua")  
    let chipichapa = Favorite(name: "Chipi Chapa Cat", image:  
        "chipichapa")  
    let catMemes = Favorite(name: "Cat Memes", image: "catmemes")  
  
    favorites.append(laughingFox)  
    favorites.append(chihuahua)  
    favorites.append(chipichapa)  
    favorites.append(catMemes)  
}
```

# Comment this part, because we're not using it

```
51
52     func addNewFavorites() {
53         let laughingFox = Favorite(name: "Laughing Fox", image:
54             "foxlaugh")
55         let chihuahua = Favorite(name: "Chihuahua", image:
56             "chihuahua")
57         let chipichapa = Favorite(name: "Chipi Chapa Cat", image:
58             "chipichapa")
59         let catMemes = Favorite(name: "Cat Memes", image: "catmemes")
60
61         // favorites.append(laughingFox)
62         // favorites.append(chihuahua)
63         // favorites.append(chipichapa)
64         // favorites.append(catMemes)
65     }
```
