

# First we will create our data structure!

```
2
3  struct Favorite: Identifiable {
4      let id = UUID()
5      var name: String
6      var image: String
7  }
8
```

## We're creating a structure for data that we're storing

# First we will create our data structure!

```
2
3  struct Favorite: Identifiable {
4      let id = UUID()
5      var name: String
6      var image: String
7  }
8
```

**We're creating a structure for data that we're storing**

**Every data have their own unique ID! So we have ID**
