

It can apply this way too!

```
struct Person: Identifiable {  
    let id = UUID()  
    var name: String  
    var age: Int  
}
```

We're creating a data structure of a person

Every person have their own unique ID Card number!

So we have ID variable

It can apply this way too!

```
struct Person: Identifiable {  
    let id = UUID()  
    var name: String  
    var age: Int  
}
```

We're creating a data structure of a person

Every person have their own unique ID Card number!

So we have ID variable

Every person have their name, and age! Therefore we have name and age variable
