

# Think, Pair, and Share in breakout room

```
struct Person: Identifiable {  
    let id = UUID()  
    var name: String  
    var age: Int  
}
```

## Create another data structure for other type of data

# Now we will create our collection, and fill the data!

```
9  struct ContentView: View {  
10  
11      var favorites = [  
12          Favorite(name: "Laughing Fox", image: "foxlaugh"),  
13          Favorite(name: "Chihuahua", image: "chihuahua"),  
14          Favorite(name: "Chipi Chapa Cat", image: "chipichapa"),  
15          Favorite(name: "Cat Memes", image: "catmemes")]  
16  }
```
