```swift
var body: some View {
    VStack {
        List {
            ForEach(favorites) { favorite in
                VStack {
                    Image(favorite.image)
                        .resizable()
                        .scaledToFit()
                        .frame(width: 300, height: 100)
                    Text(favorite.name)
                }
            }
        }

        Button("Add New Favorites") {
            // here we will add the action of adding new data
            using button
        }
    }
}
```
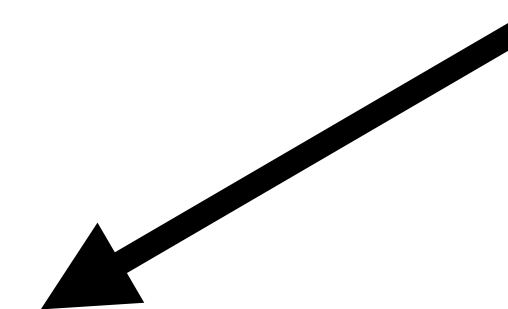

```swift
func addNewFavorites() {
    let laughingFox = Favorite(name: "Laughing Fox", image:
     "foxlaugh")
    let chihuahua = Favorite(name: "Chichuahua", image:
     "chihuahua")
    let chipichapa = Favorite(name: "Chipi Chapa Cat",
     image: "chipichapa")
    let catMemes = Favorite(name: "Cat Memes", image:
     "catmemes")
}
```
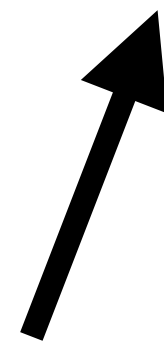

Below the code scope

of our body variable

Add this function

```
Button("Add New Favorites") {
    // here we will add the action of adding new data
     using button
    addNewFavorites()
}
```

Now call the function inside the button
