Now we will create our collection, and fill the data!

```
 9   struct ContentView: View {
10
11       var favorites = [
12           Favorite(name: "Laughing Fox", image: "foxlaugh"),
13               Favorite(name: "Chichuahua", image: "chihuahua"),
14           Favorite(name: "Chipi Chapa Cat", image: "chipichapa"),
15           Favorite(name: "Cat Memes", image: "catmemes")]
```

The content of your collection

The name of your collection

Try it yourself!

Let's revamp our list!

```swift
List {
    ForEach(favorites) { favorite in
        VStack {
            Image(favorite.image)
                .resizable()
                .scaledToFit()
                .frame(width: 300, height: 100)
            Text(favorite.name)
        }
    }
}
```
