Go back to our ContentView file, and add this

```
17    struct ContentView: View {
18
19        @Environment(\.modelContext) var modelContext
20
```

Remove our current favorites collection variable by commenting it, because we're not using it

```
//    @State var favorites = [
//        Favorite(name: "Laughing Fox", image: "foxlaugh"),
//        Favorite(name: "Chichuahua", image: "chihuahua"),
//        Favorite(name: "Chipi Chapa Cat", image: "chipichapa"),
//        Favorite(name: "Cat Memes", image: "catmemes")
//    ]
```

and revamp it into

```
@Query var favorites: [Favorite]
```
